Subject Index of Volume 34

Accumulators
estimation of pressure in hermetic Ni–Cd accumulator from its low-frequency impedance, 323
Additive
evaluation of hollow, glass microspheres used as additive in positive, lead/acid battery paste, 217
Anode growth
forces generated by anode growth in cylindrical Li/MoS_2 cells, 31

Benzotriazole
effect of benzotriazole on electrochemical behaviour of Cd in alkaline solutions, 313
Bismuth
influence of Bi on corrosion of Pb in 5 M H_2SO_4, 369

Cadmium
effect of benzotriazole on electrochemical behaviour of Cd in alkaline solutions, 313
estimation of pressure in hermetic Ni–Cd accumulator from its low-frequency impedance, 323
Calcium
in situ Raman spectra of discharge products of Ca and Li-anoded thionyl chloride cells; SO_2 generation in oxyhalide systems, 1
Carbonate ions
effect of carbonate ions on behaviour of Zn in 30% KOH, 381
Cathode
chemical and electrochemical processes in some Li–liquid cathode batteries, 81
new Li–Mn composite oxide for cathode of rechargeable Li batteries, 147
Chemical and electrochemical processes in some Li–liquid cathode batteries, 81
Chromium
secondary Li cell based on $Li_xCr_{1-y}V_yS_2$ obtained in K polysulphide melts, 119

Conductance behaviour
of mixed organic electrolytes for non-aqueous Li/MnO_2 battery, 189
Conduction characteristics
Ag arsenate amorphous electrolyte batteries; conduction characteristics and electrochemical performance, 339
Conductive polymers
characteristics of Li secondary battery using chemically-synthesized conductive polymers, 153
Corrosion
influence of Bi on corrosion of Pb in 5 M H_2SO_4, 369
Crystal chemistry
crystal chemistry of electrochemically inserted $Li_xV_2O_5$, 103
Crystal structure
V-doped Li thiochromite; properties, crystal structure and electrochemical performance in rechargeable Li cells, 129
Cycle life measurement
cycle life measurement of sealed lead/acid battery, 25

N,N'-Dichlorodimethylhydantoin
performance characteristics of Mg–*N,N'*-dichlorodimethylhydantoin primary cell, 303
Discharge products
in situ Raman spectra of discharge products of Ca and Li-anoded thionyl chloride cells; SO_2 generation in oxyhalide systems, 1

Electrochemical behaviour
effect of benzotriazole on electrochemical behaviour of Cd in alkaline solutions, 313
electrochemical behaviour of some activated Mn ores, 207
Electrochemical cell(s)
physicochemical techniques in investigation of electrochemical cells, 175
Electrochemical cell systems
exploratory studies on some electrochemical cell systems, 71

Elsevier Sequoia/Printed in The Netherlands

Electrochemical lithiation
electrochemical lithiation of Pb_3O_4, 353
Electrochemical performance
Ag arsenate amorphous electrolyte batteries; conduction characteristics and electrochemical performance, 339
V-doped Li thiochromite; properties, crystal structure and electrochemical performance in rechargeable Li cells, 129
Electrochemical studies
further electrochemical studies on Li/LiV_2O_4 secondary cells, 199
surface preparation of planar Pb electrodes for electrochemical studies in sulphuric acid solutions, 289
Electrode(s)
new apparatus for measurement of self-discharge of Ni hydroxide electrode, 331
performance of Li–Mn oxide spinel electrodes in Li polymer electrolyte cell, 39
rechargeable alkaline Fe electrodes, 269
surface preparation of planar Pb electrodes for electrochemical studies in sulphuric acid solutions, 289
Electrode material
ω-$Li_xV_2O_5$; new electrode material for rechargeable Li batteries, 113
Electrolyte(s)
Ag arsenate amorphous electrolyte batteries; conduction characteristics and electrochemical performance, 339
conductance behaviour of mixed organic electrolytes for non-aqueous Li/MnO_2 battery, 189
Li nitrate and Li trifluoromethanesulfonate ammoniates for electrolytes in Li batteries, 183
low temperature electrolytes for Li/Ag V oxide cells, 51
performance of Li–Mn oxide spinel electrodes in Li polymer electrolyte cell, 39

Failure mechanisms
analysis of failure mechanisms in Mg–Mn dioxide dry cells, 13

Glass microspheres
evaluation of hollow, glass microspheres used as additive in positive, lead/acid battery paste, 217
Iron
rechargeable alkaline Fe electrodes, 269

Lead
electrochemical lithiation of Pb_3O_4, 353
influence of Bi on corrosion of Pb in 5 M H_2SO_4, 369
surface preparation of planar Pb electrodes for electrochemical studies in sulphuric acid solutions, 289
Lead/acid battery
cycle life measurement of sealed lead/acid battery, 25
evaluation of hollow, glass microspheres used as additive in positive, lead/acid battery paste, 217
Lithium
characteristics of Li secondary battery using chemically-synthesized conductive polymers, 153
chemical and electrochemical processes in some Li–liquid cathode batteries, 81
chemical Li extraction from Mn oxides for Li rechargeable batteries, 161
conductance behaviour of mixed organic electrolytes for non-aqueous Li/MnO_2 battery, 189
crystal chemistry of electrochemically inserted $Li_xV_2O_5$, 103
forces generated by anode growth in cylindrical Li/MoS_2 cells, 31
further electrochemical studies on Li/LiV_2O_4 secondary cells, 199
Li nitrate and Li trifluoromethanesulfonate ammoniates for electrolytes in Li batteries, 183
ω-$Li_xV_2O_5$; new electrode material for rechargeable Li batteries, 113
low temperature electrolytes for Li/Ag V oxide cells, 51
monitoring voltage fluctuations for characterization of Li cells, 233
new Li–Mn composite oxide for cathode of rechargeable Li batteries, 147
performance of Li–Mn oxide spinel electrodes in Li polymer electrolyte cell, 39

performance of polyaniline positive in Li battery, 141
in situ Raman spectra of discharge products of Ca and Li-anoded thionyl chloride cells; SO_2 generation in oxyhalide systems, 1
secondary Li cell based on $Li_xCr_{1-y}V_yS_2$ obtained in K polysulphide melts, 119
V-doped Li thiochromite; properties, crystal structure and electrochemical performance in rechargeable Li cells, 129
Low-frequency impedance
estimation of pressure in hermetic Ni–Cd accumulator from its low-frequency impedance, 323

Magnesium
analysis of failure mechanisms in Mg–Mn dioxide dry cells, 13
performance characteristics of Mg–*N*,*N*′-dichlorodimethylhydantoin primary cell, 303
Manganese
analysis of failure mechanisms in Mg–Mn dioxide dry cells, 13
chemical Li extraction from Mn oxides for Li rechargeable batteries, 161
conductance behaviour of mixed organic electrolytes for non-aqueous Li/MnO_2 battery, 189
electrochemical behaviour of some activated Mn ores, 207
new Li–Mn composite oxide for cathode of rechargeable Li batteries, 147
performance of Li–Mn oxide spinel electrodes in Li polymer electrolyte cell, 39
Molybdenum
forces generated by anode growth in cylindrical Li/MoS_2 cells, 31

Nickel
alkaline Ni/Sn cell system, 65
development of Ni–Zn cells, 243
estimation of pressure in hermetic Ni–Cd accumulator from its low-frequency impedance, 323
new apparatus for measurement of self-discharge of Ni hydroxide electrode, 331

Oxyhalide systems
in situ Raman spectra of discharge products of Ca and Li-anoded thionyl chloride cells; SO_2 generation in oxyhalide systems, 1

Performance characteristics
performance characteristics of Mg–*N*,*N*′-dichlorodimethylhydantoin primary cell, 303
Physicochemical techniques
in investigation of electrochemical cells, 175
Polyaniline
performance of polyaniline positive in Li battery, 141
Polyethylene
recent advances in polyethylene separator technology, 257
Potassium polysulphide melts
secondary Li cell based on $Li_xCr_{1-y}V_yS_2$ obtained in K polysulphide melts, 119
Pressure
estimation of pressure in hermetic Ni–Cd accumulator from its low-frequency impedance, 323

Raman spectra
in situ Raman spectra of discharge products of Ca and Li-anoded thionyl chloride cells; SO_2 generation in oxyhalide systems, 1

Self-discharge
new apparatus for measurement of self-discharge of Ni hydroxide electrode, 331
Separator technology
recent advances in polyethylene separator technology, 257
Silver
Ag arsenate amorphous electrolyte batteries; conduction characteristics and electrochemical performance, 339
low temperature electrolytes for Li/Ag V oxide cells, 51
Sulphur dioxide
in situ Raman spectra of discharge products of Ca and Li-anoded thionyl chloride cells; SO_2 generation in oxyhalide systems, 1

Surface preparation
surface preparation of planar Pb electrodes for electrochemical studies in sulphuric acid solutions, 289

Thionyl chloride cell
in situ Raman spectra of discharge products of Ca and Li-anoded thionyl chloride cells; SO_2 generation in oxyhalide systems, 1
Tin
alkaline Ni/Sn cell system, 65

Vanadium
crystal chemistry of electrochemically inserted $Li_xV_2O_5$, 103
further electrochemical studies on Li/LiV_2O_4 secondary cells, 199
ω-$Li_xV_2O_5$; new electrode material for rechargeable Li batteries, 113
low temperature electrolytes for Li/Ag V oxide cells, 51
secondary Li cell based on $Li_xCr_{1-y}V_yS_2$ obtained in K polysulphide melts, 119
V-doped Li thiochromite; properties, crystal structure and electrochemical performance in rechargeable Li cells, 129
Voltage fluctuations
monitoring voltage fluctuations for characterization of Li cells, 233

Zinc
development of Ni–Zn cells, 243
effect of carbonate ions on behaviour of Zn in 30% KOH, 381
